Art Unit: 2874

1. Applicant's communication filed on March 17, 2005 has been carefully studied by the Examiner. The arguments advanced therein are not persuasive and the rejections based upon prior art made of record in the previous office action are hereby maintained. Thus, this action is made final.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kazarinov et al. (U.S. Patent 6,289,151 B1), and further in view of Boyne et al. (U.S. Patent 6,385,353 B1).

Kazarinov et al disclose all-pass optical filters (continuously variable optical delay line) comprising ring resonators to reduce the dispersion in an optical communication system by creating delays (see column 3 lines 8-27). However, Kazarinov et al do not teach an incremental variable optical delay line. Boyne et al teach optical delay lines having different path regions of parallel paths and curved paths (see Fig. 3). Since Kazarinov et al further teach coupling the continuously variable optical delay line to different optical devices such as a MZI (optical delay line) having path lengths that are different (see column 9 lines 10-25) and using a plurality of optical paths are known in

Art Unit: 2874

the art, applying Boyne et al's incremental variable optical delay device in Kazarinov et al would have been obvious to one having ordinary skill in the art to obtain desired delays in an optical system that requires a plurality of paths.

Response to Arguments

4. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Koh et al (US 2004/0080705 A1) teach serially interconnected VODs for a wide delay and a fine delay resolution. Baldwin et al (U.S. Patent 5,943,636) teach an incremental variable optical delay.
- 6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Juliana K. Kang whose telephone number is (571) 272-2348. The examiner can normally be reached on Mon. & Fri. 10:00-6:00 and Tue. & Thur. 10:00-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rod Bovernick can be reached on (571) 272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
